- ★ We use innovative, specially designed reflector and PC cover to optimize beam distribution.
- ★ This reflector and PC cover create soft, pleasant light, with low glare.
- ★ The reflector and PC cover design provides high luminescence with an even beam pattern.

- ★ Unique heat sink design.
- ★ Seamless aluminum and structure design to reduce the operating temperature of the LED chips.
- ★ Excellent heat sink guarantees a longer life.
- ★ The size-adjusted design can make the size switched freely between 5" & 6" in the actual application.
