Footnotes

- State of the Art SPL Optics
- Because this bulb radiates considerable heat, do not use in enclosed, close fitting fixtures, or in close proximity to people, combustible materials, or substances adversely affected by heat or drying.
- Even though this bulb may continue to light after the lens or reflector is cracked or broken, it should be replaced as soon as possible since the pressure filled inner capsule could unexpectedly shatter, creating a risk of personal injury or property damage. In addition, the inner capsule produces ultraviolet radiation that can cause injury to the eyes and skin with prolonged exposure without the blocking effect of the outer glass bulb.
- To avoid electric shock and/or skin burns, turn off power and allow bulb to cool before handling or attempting replacement.
- For indoor or outdoor use where not directly exposed to weather. Exposure to weather may damage the bulb.
- Use only with ceramic/porcelain sockets and in fixtures rated for this bulb type, including voltage and wattage.
