#### Footnotes

- Should not be used in equipment where base temperature will exceed 500F.
- Incandescent lamps operated at less than rated voltage provide a lower light output, longer life, lower color temperature and are less efficient in terms of lumens per watt.
- May not give satisfactory performance if any accessory lighting equipment touches the glass bulb.
- @ 120 volts, approximate 44 watts, 240 lumens, 5000 hours
